

TAKING OVERHEAD RELIABILITY TO THE NEXT LEVEL

NRTC is Partnering with Exacter Technology to Improve Reliability and Reduce Power Outages

We're bringing Exacter cutting edge reliability practices to rural cooperatives. Using Exacter's patented technology and field-proven process, cooperatives will be able to predict and locate points on the grid where deteriorating equipment poses risk for outages. Reports and mapping allow you to prioritize maintenance based on actual field conditions.

Contact your NRTC Regional Business Manager, or call 866-672-6782 to find out more and set up an informative online webinar.

Attend an Online Webinar & Learn Predictive Methods, the Latest Technologies, and the Next Best-Practices in Grid Reliability

By attending an NRTC-Exacter Webinar You will Learn:

- How predictive data can lead to fewer outages and continuous reliability improvement
- How this technology and method identifies the points on your overhead most "at-risk" of an outage
- How Exacter technology can provide an overhead "health assessment" of your system in a matter of a few weeks
- How this technology can improve storm recovery and evaluate unseen damage after the storm
